My Obsessions

Work Experience

Software Engineer at McKinsey & Company (Jan 17 - Present)
Digital McKinsey is the technology arm of the global management consulting firm, where I work with a global team on delivering software solutions to help clients solve business challenges.
Stack: Node (Javascript), Express, React, Webpack, Babel, SCSS.

Software Engineer at Broadly (7 Months)
Broadly helps businesses get reviews & feedback from their customers. I work alongside a talented team of engineers to maintain, build new features and improve the core marketing software.
Stack: Node (Javascript), Express, Mongo, Mocha, LESS, Handlebars, Gulp.

Software Engineer at Dubizzle (4 Years & 10 Months)
Dubizzle is the MENA regions' leading online classifieds service. A fast growing company that served 90 million searches a month in 2015. 5 Years is a long time in a startups life; during which I worked on a variety of projects. My role was overwhelmingly front-end related with a few stints working on back-end, design & business development projects.
Stack: Javascript, Python, Django, Elasticsearch, Redis, MySql, SASS, Grunt.

Designer & Software Engineer at G-TECH (5 Months)
Designed and developed web applications, some of which were used internally by client organizations such as Standard Chartered Bank and Thuraya Telecommunications.

Freelance Designer & Software Engineer (4 Years)
Designed and developed websites and web applications for small businesses.
Examples: gcfid.com, dominuspropertypartners.com, egreen.biz.

Recommendations

Kumail is always brimming with ideas. He's a developer but he's not a cog. In every interaction with Kumail, I found that he was always keen on looking at the big picture. Keeping the product's overall direction in focus is a crucial part of being a great developer and Kumail has got this down pretty well. Not only that, but he's highly motivated and I've been repeatedly impressed by the quality of his professional work and personal side projects. He would be an asset to any development team.

Ashray Baruah
Co-Founder & Head of Engineering and Technology at GapJumpers

Kumail is an amazing all around product person, He is an amazing Front-end developer, a good designer, Back-end developer & most importantly he has a very bright and smart business mind.

Working with Kumail is really something I enjoy. I've already learnt a lot from him, especially on the business side of things. I'll not be amazed if after 5 years he is one of the most successful managers/entrepreneurs in the region maybe even in the world.

Ahmed El Gabri
Senior Front-end Developer at Lightspeed HQ, Amsterdam

Kumail is a very professional web-designer & developer and I entirely recommend his services to anyone looking for state-of-the-art programming.

Kumail has a very good technical and aesthetic understanding, assimilates requirements and design brief instantly and precise and transforms your ideas 1:1 into a web presence in accordance to the latest status quo of technology.

I have worked several times with Kumail and always was fully satisfied with his superlative work and output.

Sven Mueller
Founder and Managing Partner at SVENM
